

CollabBoard — AI Cost Analysis (Subscription Model)

Development Costs (Actual)

Claude API Spend (Feb 1–Feb 21, 2026): **\$41.07**
- Input Token Cost: \$26.21
- Output Token Cost: \$14.86
Primary Model: Claude Sonnet 4.6
Firebase Infrastructure: \$0 (all services within free tier)
Total Development AI Cost: **\$41.07**

Subscription Pricing

CollabBoard Pro: **\$9.99/month**
AI features are gated behind the Pro subscription tier.

Production Assumptions (Paid Users)

- 8 AI commands per session
- 8 sessions per month
- 64 AI commands per user per month
- ~1,600 tokens per command (1,200 input / 400 output average)
- Estimated cost per command: ~\$0.003

Unit Economics (Per Paying User)

Estimated AI cost per user: ~**\$0.25/month**
Revenue per user: **\$9.99/month**
AI cost as % of revenue: ~**2.5%**
Approximate AI gross margin: ~**97.5%**

Scale Scenarios (Paying Users Only)

Paying Users	Monthly Revenue	Estimated AI Cost	AI % of Revenue
100	\$999	~\$25	2.5%

1,000	\$9,990	~\$250	2.5%
10,000	\$99,900	~\$2,500	2.5%
100,000	\$999,000	~\$25,000	2.5%

Conclusion

With AI gated behind a \$9.99/month subscription, inference cost remains a small and predictable percentage of revenue. The model scales linearly and maintains strong gross margins even at high user volumes.
